POOL SYSTEMS

Above Ground Pool 13" Sand Filter System

Perfect for Soft-Sided Above Ground Pools

This Above Ground Pool System delivers the industry's best filtration for a sparkling pool and includes service preferred features like never before. Superior hydraulic performance, amazingly quiet and delivers a total solution for your pool.

- 13" Sand Filter with ½ HP, 30 GPM Pump
- Retrofits Soft-Sided Pools with easy installation
- Sand Filter Technology provides extended time between cleaning (backwashing)

Above Ground Pool 13" Sand Filter System

System

- 13" Sand Filter with ½ HP, 30 GPM Pump
- Perfect for pools up to 10,000 gallons
- Provides extended time between cleaning compared to most filters provided with soft-sided pools
- Includes 1¼", 1½" and 2-40mm hose adapters
- Easy to install

Filter

- 4-way Top Mount Valve provides for easy maintenance
- Holds 45 pounds of sand

Pump

- TEFC Motor (Total Enclosed Fan Cooled Motor) offers the quietest motor available
- 115 Volt, 60 hz with a 6 ft cord
- Strainer basket for easy cleaning and longer life vs. most OEM pumps

Feature	Benefit	Advantage
Sand Filter	Extend time between cleaning (backwashing)	Cartridge elements provided with many soft-sided pool systems must be regularly replaced
Familiar two-piece flange clamp design	Easy to install and provides simple servicing	One-piece clamp designs can be very difficult to align and install
Pump hair and strainer basket included	Prevents large debris from clogging pump impeller	Pumps provided with many soft-sided pools do not include a strainer basket, increasing potential for clogged impeller
