POOL SYSTEMS

## Above Ground Pool Sand Filter Systems

### *Complete Systems for Any Above Ground Application*

Our complete line of Above Ground Systems deliver the industry's best filtration to clean your pool with service preferred features like never before. Superior hydraulic performance, amazingly quiet & efficient operation delivers a total solution for any pool.

- Full-flow 360° laterals provide energy-efficient operation and thorough backwashing
- Seven-position valve makes changing filter function quick and easy
- TEFC Motor technology with exterior fan for quiet operation and efficient motor cooling
- Reduced energy costs
- For above ground or small in-ground pools

# Above Ground Pool Sand Filter Systems

- TEFC Motor (Total Enclosed Fan Cooled Motor) offers the quietest motor available
- 7-Position Operating Valve for simple operation and dependability
- Rotational Laterals for full flow, reduced back pressure, & simple maintenance
- Flange clamp design allows for 360° rotation and simple plumbing
- System includes all connections from pump/system plus 2-6ft. 1½” hoses for connection to pool
- Corrosion-proof construction
