POOL SYSTEMS

Sand Filters

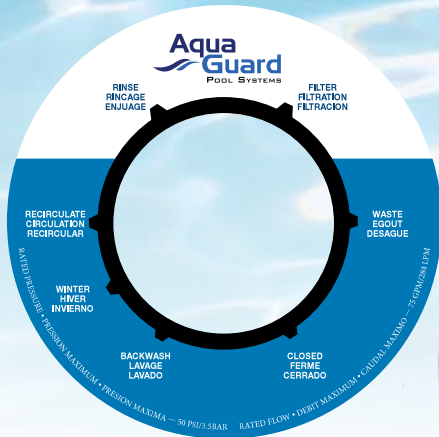

Crystal Clear Water with Little Effort!

AquaGuard high-rate sand filters offer leading edge technology for unparalleled efficiency, flow & serviceability. The robust slotted laterals with rotational design allow for simple installation and outstanding performance. The seven position operating valve provides simple operation and dependability.

- Simple to operate and maintain, built with long-term reliability in mind
- Maximum water clarity with extra deep sand bed for long filter runs and efficient backwashing
- Top mount 7-position 1½" multi-port valve features pressure gauge & relief valve, all for simple operation
- Filtration performance is enhanced by the rotational laterals that allow for water to be exposed to the maximum sand surface area

Sand Filters

- 7-position valve for simple operation
- 360 degree clamp for easy installation
- Corrosion proof filter tank for years of dependability
- Thermoplastic base for quick installation
- Drain valve for easy maintenance

Twist n snap laterals for fast installation & maintenance

Dirt Never Had A Chance

Model #	Filter Diameter	Filtration Areas	Required Sand (lbs)	Flow Rate (US-GPM)	Turnover Rate (Gallons)	
					8 Hours	10 Hours
AGSF16	16"	1.40 sq.ft.	100	35	16,800	21,000
AGSF19	19"	1.80 sq.ft.	150	40	19,200	24,000
AGSF24	24"	2.30 sq.ft.	300	60	28,800	36,000
